

Consideration of the problem of absorption of some chemical elements by the cells of alga *Spirulina platensis* on the basis of the results of short-time experiments. / N. Kuchava. /. Nano Studies. – 2015. – # 11. – pp. 143-150. – geo.

The problem of absorption of chemical elements Cu, Zn, Ni, Ag, Cd, and Hg by the cells of one of the biotechnologically interesting bluish-green alga *Spirulina platensis* is considered according to the short-time (120 min and even less) experiments. Fig. 9, Ref. 14.
